

IH/IV
2

1) Plant Tissue

Animal Tissue

→ Plants grow cont. throughout life.

→ After reaching maturity stage animals don't grow further.

→ Less maintenance energy required.

→ More maintenance energy required.

2) Done in ^{previous} hw.

3) What are 4 diff. types of animal tissue?

→ Epithelial.

→ Connective.

→ Muscular.

→ Nervous.

4) Why blood is known as spec. connective tissue?

Ans) Blood is considered as a type of connective tissue because it connects the body stems, transports O_2 & nutrients to all the parts of the body, & removes the waste products.
