Q You feel concerned about the cutting down of trees in and around cities and towns in India. Write an article on the topic "Importance of trees".

Ans) Trees are our best friends. They are very important to sustain life on Earth. Without trees life would not have been possible. They provide us so many things but ~~except~~ nothing in return except love and care. They ~~are~~ provide us with two of life's most crucial components - oxygen and food. They <sup>also</sup> provide us freshly brewed air, food, fiber, shelter, ~~and~~ medicines, timber (wood). They ~~take~~ take in carbon dioxide and give out oxygen. They also provide cool shades during summers and during rains. They are the natural shelter of many animals and birds. They ~~prevent~~ prevent soil erosion and flood. They help in making the land fertile. They protect the biodiversity of the ecosystem. When there are more trees, there is coldness and coldness attracts the cloud for rain. Due to rain, all the pools are filled and greenery is covered ~~every~~ everywhere. Trees need to be conserved as they play a vital role in our ecosystem.

They helps in reducing air pollution. Trees are considered as carbon sinks which means they have the ability to soak up carbon dioxide within environment and store it within themselves. This not only reduces the amount of carbon dioxide in our environment but also the impact of the green house effect. Our dependence on trees are not reduced. Absence of trees leads to hot weather, air pollution etc. Our needs are so high that we have started cutting down huge swaths of forests for the expansion of human land. We must save trees and plants to keep our environment clean and primate a healthy and happy life. Let us all take the vow ~~to~~ not to harm trees in future.
