

Q3. The three essential parts of cell are

- Cell membrane - Each cell surrounded by a cell membrane, also called plasma membrane

- Cytoplasm - The cytoplasm is a semi-liquid (viscous), colourless and translucent substance. It is found between the nucleus and the cell membrane.

- Nucleus - Nucleus is a small spherical mass mostly located towards the centre of the cytoplasm. It is the most important part of the cell.

- It regulates and coordinates various like processes of the cell.

- It plays an important part during cell division.
