Q1) TABLE
Example

What does this show?

- a) Imagine what would happen to Cotton if such circumstances occur without cultivation. Farmers then they will be forced by the on its companies will eventually bankrupt. This will also declined net to buy rupt. This will also from Indian market decrease our economic and import all cotton growth as the export they need from other cotton will decline countries. Indian Cotton This is an example Cultivation will become as dependence of less profitable and the primary sector on farmers may even go bankrupt. If they can't Secondary sector quickly switch to other crops. Cotton prices will fall,

b) Farmers buy many goods such as tractors, pumpsets, electricity, pesticides and fertilizers. Imagine what would happen if the price of fertilizer or pumpsets go up. Cost of cultivation of the farmers will rise & their profits will be reduced.

If such circumstances occur then the profit of farmers will reduce & they might even go bankrupt. Due to low profits the capitalists will reduce & have to import crops.

c) People working in industrial and service sectors need food. Imagine what would happen if there's a strike by transporters & services. This is an example of dependence of primary and secondary sector over tertiary sector. This will affect both the side & on the other hand the urban people. Thus the economy of the country will face a drastic downfall.

← primary & secondary sector as the farmers will suffer a loss

Primary Sector

a) This Sector is concerned with the production or extraction of various natural resources raw materials.

b) It is also called as a Agricultural Sector.

c) Ex: Agriculture, Mining etc.

Secondary Sector: Basket Weaver, worker in match factory, potter.

Tertiary Sector: Tailor, priest, Cowrie money lender, Call Centre, employee

4) Students in Schools are Classified into Primary and secondary or Junior and Senior on what basis?

Ans Students in schools are Classified into Primary or Secondary on the basis of their standard of learning.

Yes this Classification is necessary for proper education of students according to their Capacity of learning.

3) Do you think classification of economic activities into Primary, Secondary and Tertiary is useful? Explain.

Ans) The classification of economic activities into Primary, Secondary and Tertiary is useful on account of the information it provides on how and where the people of a country are employed. Also, this helps in determining that which sector contributes more or less to the country's GDP and per capita income. If the Tertiary sector is developing much faster than Primary sector then it implies that agriculture is depleting and govt. must take measures to rectify this. To keep a proper knowledge about the economic growth of the country this classification is important.

Primary Sector: Mines, Poultry, Gardening,
oil, extraction, forestry etc.

Secondary Sector: Manufacture of
automobiles, tools, farming
utilities.

Tertiary Sector: Call centre,
employees, doctor, engineer, insurance,
beautician, taxi etc.
