

1.) Environment is getting polluted by some human activities, like throwing garbage on road, not realising the harmful gases from industries and throwing the garbage in water.

2.) Environmental pollution affects us in many ways like by inhaling harmful gases we can get lung cancer, cancer, heart disease, TB, asthma and by water pollution we can get cholera, swine flu, polio, diarrhoea and many more diseases.

3.) Ways to reduce pollution are :-

→ Say no to ~~plastic~~ plastic bags.

→ Reuse & Recycle

→ Use public transportation
