10.12.21

1. Mention the names of all the simple machines and write a use of each in our daily life.

Ans: There are many types of simple machines like: The inclined plane, lever, wheel and axle, the pulley and ~~the screw~~.

- o The inclined plane - Inclined plane are used in hospital, in home, in truck, in park etc.
- o Lever = Lever is a simple machine which makes our work easier like it helps us to catch fish and to pull heavy rocks and it is found in pliers, nutcracker etc.
- o Wheel and axle = Wheel and axle are used in door knobs etc.
- o Pulley = Pulley are used to pull object like pulling a flag, a wheel well etc.
