

1.2.21  
C.W

Answer the following questions.

1) How many different types of motions does the Earth have?

Ans. The earth has two types of motions - Rotation & Revolution  
Rotation - Movement of the earth around the sun ~~also~~ along a fixed orbit is called revolution.

2) What is meant by 'rotation' of the Earth? What is the effect of rotation?

Ans) When the earth spins about its axis is called rotation of the earth. This rotation of the Earth causes day and night.

3) Why is one day and one night on the Earth of 24 hrs?

Ans. The Earth completes one rotation around in 24 hrs. That is

axis in 24 hrs. That is why  
one day and one night on the  
earth is of 24 hrs.

Ans. Earth moves very fast. we do ~~did~~ not feel that earth is moving because earth is so big. from us.

4) In the month of June it is summer in the Northern Hemisphere and ~~at~~ winter in the Southern Hemisphere. Why?

Ans. In ~~to~~ the month of June it is summer in the Northern Hemisphere and winter in the Southern Hemisphere because the north pole is tilted towards the Sun, the south pole is tilted away from the Sun.

5. Why do the seasons repeat year after year?

Ans. The seasons repeat year after year as the revolutionary behaviour of the Earth continues as well as the fact that Earth is permanently tilted on its axis; the Earth goes through the same behaviour each year.
