**Q** Define reflection of light.

**Ans**) The returning of light in the same medium after striking a surface, is called reflection of light.

**Q** State laws of reflection.

**Ans**) The laws of reflection are-

- \* The angle of incidence is always equal to the angle of reflection
- \* The incident ray, the reflected ray and the normal, all lie in the same plane.

**Q** Define primary colours.

**Ans**) Primary colours are the colours of light by mixing which white light is obtained.

**Q** Differentiate between real and virtual image.

**Ans**)                    Real image

Virtual image

- |                                                       | Real image                                                           | Virtual image                            |
|-------------------------------------------------------|----------------------------------------------------------------------|------------------------------------------|
| * It can be obtained on a screen                      | * It cannot be obtained on a screen                                  |                                          |
| * The rays of light after reflection meet at a point. | * The rays of light after reflection appear to diverge from a point. |                                          |
| * It is always inverted                               |                                                                      | * It is always erect.                    |
| * It is formed in front of the mirror                 |                                                                      | * It is always formed behind the mirror. |
