

Q1) List some of the similarities between plant and animal cell.

Ans) * Both animal and plant cells are eukaryotic cells.

* Both cells have some common organelles like cell membrane, cell nucleus etc.

Q2) List some differences between plant and animal cells.

Ans)	Plant cells	Animal cells
*	Cell wall is present	* Cell wall is absent.
*	Plastids are present.	* Plastids are absent.
*	Centriosome is absent except in some lower forms.	* Centriosome is present.
*	Nucleus lies on one side in the peripheral cytoplasm.	* Nucleus ^{usually} lies is in the centre.

* Plant cells are larger in size. * Comparatively smaller in size
