

HW  
M

## The constitution and the need for law

Date 29/9/21  
Page

1) Define the term Constitution?

Ans-

A constitution is a set of rules, laws and principles according to which a country is governed.

2) What are the three organs of the Government?

Ans-

The three organs of the Government are

\* Legislature

\* Executive

\* Judiciary

3) What is meant by Dissent?

Ans- Dissent refers to the act of disagreeing with someone ~~for~~ over something leading to a debate.

4) What do you mean by Rule of law?

Ans- Rule of law is a legal maxim that suggests that no one is above the law. And governmental decisions must be made only by applying known legal and moral principles.

5) When can a law be declared as null and void by a court?

Ans - If it is contradictory to a standing Constitutional law. Also previous court rulings stand as precedents.

If cases arise about laws which counter previously set precedents, courts may rule those laws unconstitutional or null and void.

Some laws are a bit murkier, and the courts need to make a decision regarding its constitutionality.

But when it comes to laws that are in clear violation, it would seem the government doesn't really have the responsibility to defend the law if court (or even enforced the law) as the law is already null and void.
