2- We should conserve soil.

A- We know that soil is a vital resource which is responsible for the sustenance of all plants, animals and human beings. The removal of top soil is called soil erosion. If it will be unchecked it can lead to soil depletion.

3- Cotton is grown in Maharashtra

A- Black soil is found in Maharashtra. This deep ^{and} clayey soil swells when it is wet and contracts when dry. Therefore, it develops wide cracks during summer. It is ideal for the growth of cotton.
