

## Writing Junction

In this chapter, we read how plastic is recycled. According to surveys done worldwide, tons of plastic is used every day all over the world. Surveys are examinations done on a topic by asking people their opinions on it.

Look at the survey sheet given below. Ask these questions to five people and record their responses as yes/no.

Questions	Response 1	Response 2	Response 3	Response 4	Response 5
Do you reuse plastic bottles at home?	Yes	Yes	NO	Yes	No
Do you use plastic utensils at home?	Yes	No	Yes	Yes	Yes

Questions	Response 1	Response 2	Response 3	Response 4	Response 5
Do you dispose of candy wrappers or food packets on the streets?	No	No	No	No	No
Do you reuse pickle/jam jars at home?	No	No	Yes	Yes	Yes

Now that you have recorded the responses, write a paragraph on your findings.

You can start like this:

*All the five people said that they never throw plastic wrappers on the streets.  
Only two people segregate wastes at their houses ...*

1. After my survey 3 people said they reuse plastic bottles at home. And 2 people said they don't reuse plastic bottles home.
2. 4 people said they use plastic utensils at home. And 1 person use plastic utensils at home.
3. All the five people said that they never throw dispose candy wrappers or food packets on the streets.
4. 2 people not reuse pickle/jam jars at home and 3 people reuse pickle/jam jars at home.
