TUESDAY

21

1) Light is defined as a form of energy which produces the sensation of vision in eyes.

2) Natural sources of light are those sources of light those are formed naturally. Ex → Sun, stars, etc.

Whereas, the artificial sources of light are the sources of light created by humans. Ex → Tubelight, burning candle, etc.

3) Luminous

Non-luminous

* The bodies which emit their own heat and light are called luminous bodies.

Ex → Sun, stars, etc.

* The bodies which do not emit their own heat and light are called non-luminous

bodies. Ex → Moon, Table, etc.
