Physical Quantities and Measurements

1) What is the need and importance of measurement?

Ans → We all use Measurements in our daily lives.

Measurement is very useful and important in our daily lives. For ex → When we are buying fruits and vegetables the shopkeeper measures their mass by his balance. When we are suffering from cold or fever, the doctor measures our body temperature with a thermometer. Like this ways we use the measurement in our daily lives.

2) How measurement is expressed?

Ans → The measurement is expressed by symbols. It is
