

4. Add :

i) 13 and 15

$$A: \rightarrow 13 + 15 = 28$$

ii) -13 and 15

$$A: \rightarrow (-13) + 15 = 2$$

iii) 13 and -15

$$A: \rightarrow 13 + (-15) = 13 - 15 \\ = -2$$

iv) -13 and -15

$$A: \rightarrow (-13) + (-15) = -13 - 15 \\ = -28$$

5.

i) 259 and 214

$$A: \rightarrow 259 + 214 = 473$$

ii) (-528) and (-243)

$$= \cancel{-528} - \cancel{243} = -771$$

$$A: \rightarrow 528 + (-243)$$

$$= -528 - 243 = -771$$

iii)  $(-623) + 326$

A:  $\rightarrow = -623 + 326 = -297$

iv)  $258$  and  $-473$

A:  $\rightarrow 258 - 473 = -215$

v)  $-622$  and  $-254$

A:  $\rightarrow = -622 + (-254) = -622 - 254$   
 $= -876$

6: i)  $5$  from  $8$

A:  $\rightarrow 8 - 5 = 3$

ii)  $-5$  from  $8$

A:  $\rightarrow = 8 - (-5) = 8 + 5 = 13$

iii)  $4$  from  $-7$

A:  $\rightarrow -7 - 4 = -11$

iv)  $-8$  from  $-2$

A:  $\rightarrow -2 - (-8)$   
 $= -2 + 8 = 6$

v)  $-3$  from  $12$

A:  $\rightarrow 12 - (-3) = 12 + 3$   
 $= 15$

vi)  $-6$  from  $-3$

A:  $\rightarrow 3 - (-6) = -3 + 6 = 3$

i) -123 from 453

$$\begin{aligned} \text{A: } & 453 - (-123) \\ & = 453 + 123 = 576 \end{aligned}$$

ii) -78 from -12

$$\begin{aligned} \text{A: } & -12 - (-78) \\ & = -12 + 78 = 66 \end{aligned}$$

iii) 329 from -124

$$\text{A: } -124 - 329 = -453$$

iv) -222 from 0

$$\begin{aligned} \text{A: } & 0 - (-222) \\ & = 0 + 222 \\ & = 222 \end{aligned}$$
