Q: Define light Energy

Ans Light is defined as a form of energy which produces the sensation of vision in the eyes.

2. Differentiate Luminous and non luminous object.

The bodies which themselves emit light are called luminous bodies. Ex: torch, electric, burning candle, Jyoti etc.

The bodies which don't emit light by their own, but they shine because of the light falling on them from luminous body are called non-luminous bodies. Ex: moon, earth, table etc.
