5. Name the various types of Microcomputers. Explain any two.

Ans- Various types of microcomputers are Desktop, laptop, tablet.

• Desktop Computers:

- These computers are designed to fit comfortably on top of desks.
- They typically come with several units, such as monitor, CPU, Keyboard and mouse which are connected to each other and work like a single unit.

• Tablets

- These computers are smaller and lighter than laptop computers but bigger than smart phones.
- Instead of a keyboard and mouse, tablets use touch sensitive screen for typing and navigation.
- Tablets generally have a screen size between 7-10 inches.

6. Write a short note on the Abacus.

Ans-• Abacus was the first mechanical device used for calculators. It was developed in China.

- It was made up of wooden frame

with rods, each having beads.

- The frame was divided into two parts - Heaven and Earth.
- Each rod in Heaven has 2 beads and each rod in Earth had 5 beads.
- Abacus was used for addition, subtraction, multiplication and division.
