

1) Define light Energy.

A → Light energy is a form of energy and is expressed in joules

2) Differentiate luminous and non luminous object.

A → Luminous bodies - The bodies which emit their own light are called luminous bodies.

ii) Non-luminous bodies - The bodies which do not emit light by their own, but ^{become} ~~be~~ visible by the light falling on them from some luminous body, are called non-luminous bodies.
