

Difference between communicable and non-communicable diseases.

Communicable diseases

Non-communicable diseases

- Communicable diseases can spread from one person to another healthy person.
- I can spread by insects, breathing, coughing or by junk food.
- Ex - Chickenpox, cholera, polio.
- I can spread by insects or by using his things.

- Non-communicable diseases cannot spread from one person to another healthy person.
- It will not spread by anything because it is non-communicable.
- Ex - Night blindness, Beriberi, Rickets.
- It will not spread.
