Answer the following questions.

4. In the month of June it is summer in the Northern Hemisphere and winter in Southern Hemisphere. Why?

Ans- In the month of June it is summer in the Northern Hemisphere and winter in the Southern Hemisphere because the North Pole is tilted towards the Sun, the South Pole is tilted away from the Sun.

5. Why do the seasons repeat year

after year?

Ans - The seasons repeat year after year as the revolutionary

behaviour of the Earth continues

as well as the fact that earth

is permanently tilted on its axis;

the earth goes through the same

behaviour each year.
