C- Answer the following questions

1- A globe is the most accurate

way to represent the Earth

However, we generally use a

map rather than a globe

to study the Earth. Why

is this?

Ans- We generally use a map

rather than a globe to

study the earth because

- It is easy to carry a map around.

- A map can show the

entire surface of the Earth
-h at a glance.

- A map can show any number of detail depending on its scale.

2- A map of the Earth will have errors in the shape and size of a places shown on the map. Why is that so?

Ans- A map of the Earth will have errors in the shape and size of places shown on the map because we

cannot flatten out the Earth's surface and show it accurately.

3- How is the direction usually shown in maps?

Ans- Usually maps are drawn with north at the top. Most maps indicate North with an arrow marked N. If you know where north lies, it is easy to find south, east and west. If north is at the top, then

South is at the bottom,
east is the right, and
west to the left.

4- What do you understand
by the term 'scale of a
map'?

Ans- Scale of a map shows
the ratio between distance
-es on a map to the
actual distance on the ground
-d-

5- Which standard colours
are used in maps?

Ans- Deep blue Standard colours are - Blue, brown, yellow and green.

- Deep blue shows deep waters.
- Light blue shows shallow waters.
- Dark brown shows high mountains.
- Light brown shows lower mountain and hills.
- Yellow shows plateaus.
- Green shows plains and low lowlands.

6- What are symbols?

Ans- A symbol is a picture or sign used in a map to represent something from the real world. Colours are also used as symbols. The key or legend explains what each symbol stands for.
