

Q) Delhi is further away from the equator than Chennai. But summer in Chennai is not as hot as in Delhi. What are the reasons for this?

Ans) The reasons for this are :-

- > Chennai is a coastal city. Water regulates the temperature there thus keeping its climate moderate and mild.
- > Delhi is not a coastal city and also it is getting extreme climate.
- > Another reason is hot winds from Rajasthan also make the climate of Delhi hot and dry during summer.
