

HW
27/7/21

Ramu the gardener is trying to pull out the weeds

However he has to apply great force. Why do you

think he has apply so much ?

Ans- As roots of the plants or crops hold the soil very

tightly and by ~~that~~ doing that plants become strong.

And if plants will be strong then it will not easy to pull ~~the~~

them out. That's why Ramu applies great force to pull out the weeds.
