

Q → What do you mean by contact force?

A → Contact force are force ~~the~~ that are physically touching each other.

Q → Give some example of contact force?

A → Muscular force, frictional force etc.

Q → ~~Give~~ List some types of non-contact forces?

A → The ~~these~~ types of non-contact forces are — gravitational force, magnetic force and nuclear force.

Q → What Explain electrostatic force?

A → Electrostatic ~~force~~ ^{is a} branch of physic that studies electric charge at rest. Since classical physic, it has been known ~~as~~ that some materials such as amber, attract light weight particles after rubbing.
