

HOME ASSIGNMENT

REPRODUCTION IN HUMANS

3/8/24
HW

①

Name the post fertilization events.

Ans

Post-fertilization events -

⇒ Embryo formation (Embryogenesis) & development.

⇒ Differentiation - further cell division to form, heart, circulatory system etc. of the foetus.

⇒ Parturition - Process of giving birth to a baby.

②

Write any two functions of Placenta.

Ans

Two functions of Placenta -

* It helps in connecting the developing foetus to the uterine wall. Thus, helping in nutrition absorption, gas exchange, mother's blood supply, waste elimination etc.

* It develops hormones (Oestrogen & Progesterone) which support the lining of the uterus so that foetus (& Placenta) can grow & develop.
