HOME ASSIGNMENT

Date _____
Page _____

① Write the location of master gland. Why it is named so?

Ans The master gland is located below the brain. The Pituitary gland is called the master gland because it controls other glands i.e., it secretes several hormones, some of which regulate the activity of other endocrine glands.

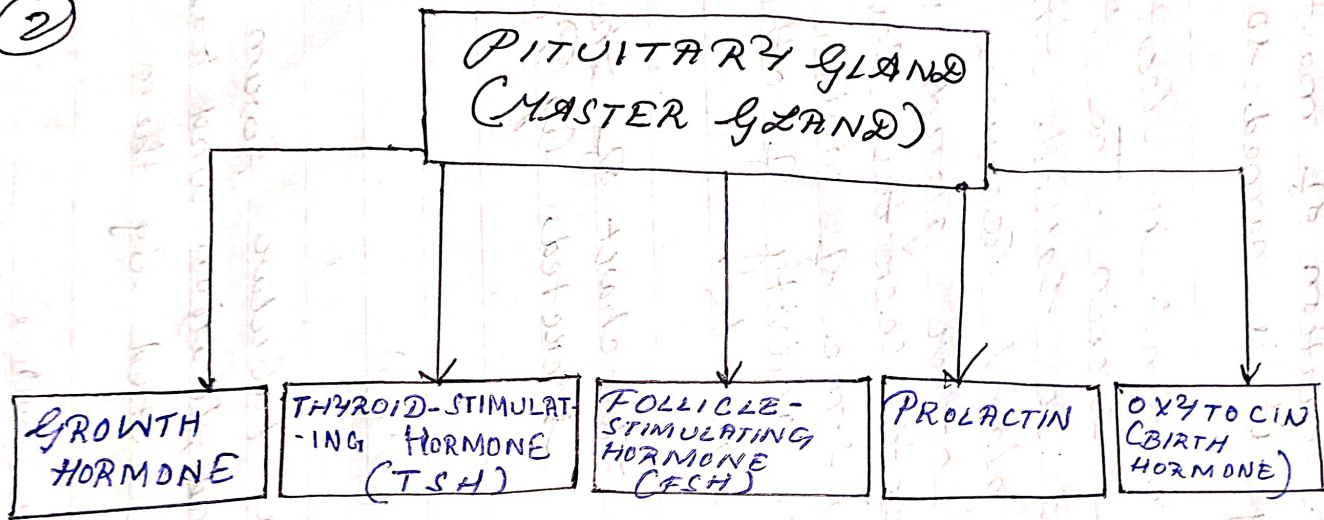

② Draw the flowchart of the hormones secreted by Pituitary gland.

Ans Next Page (plain)

③ Write in a tabular form of the gland, location and hormones secreted by them.

Ans Next Page (Ruled)

2

3

GLAND (NAME)	LOCATION	HORMONES (SECRETED BY THEM)
THYROID GLAND	in the neck (below the larynx).	Thyroxine.
ADRENAL GLAND	above the kidney.	Adrenaline.
PANCREAS	behind the stomach. (in the abdominal part)	Insulin and Glucagon.
PITUITARY GLAND	Below the brain	Growth hormone, Thyroid-stimulating hormone (TSH), Follicle-stimulating hormone (FSH), Prolactin & Oxytocin (Birth Hormone).
