

ARTICLE WRITINGNUCLEAR FAMILYby XYZ

A family - "Individually we are each one colour, together we make a rainbow." This quote states that Family is always together in times of happiness and sorrow. Family is like a music with high & low notes but it is always a beautiful song. In a family, there are ups and downs but the family is the ~~low~~ bonding between each other.

A Nuclear family is a family consisting a father, a mother & their children. In this system, the family is the basic social unit. It can be more

financially stable which equals more opportunity.

It also gives more strength and stability to the family. In this family, communication skills improve so, conflicts would be lesser as there are only few family members at home. In this family peace and prosperity exists. Children would have stability and consistency in their lives and they would exhibit behavior

Nuclear family also has some disadvantages. As, there are no grand~~fa~~-parents or cousins, they ~~to~~ changes are there of loneliness. Financial Responsibility always ~~to~~ lies on the head of the family. Children don't get proper

love and affection from their grandparents. They sometimes don't learn etiquette morals.

So, Nuclear family sometimes good and sometime sad. In life a coin has two different sides, the family also have sweet and sour taste which is a rule of life. We should go with it and always try to be happy and overcome failure to achieve success in our life journey.
