BANYAN TREE

Banyan tree is a tree with many hanging branches which are penetrating down into the soil. ^{It is} also called Banyan fig. It is a tree of mulberry family which is the native of India.

Banyan tree is the national tree in India. It produce crops of fig which becomes the food for many birds, fruit bats and other creatures. This tree is also considered immortal as it lives for nearly 200 to 300 years. It is considered sacred in many ~~to~~ ancient Indian scriptures. So, it is worshipp-ed in many parts in India. It symbolizes the humant to manage and handle their responsibility efficiently. Thus, we shouldn't cut the trees and protect them together.
