HOME ASSIGNMENT

classmate

Date _____

Page _____

⇒ Mention factors responsible for the uneven distribution of population in the world. Give example.

Ans → There are the factors responsible for uneven distribution of the population in the world can be classified into 2 groups -

⇒ Physical Factors

Includes -

* Relief - (suitable for farming, service activities)

Ex - Indo-Gangetic Plains region is densely populated and the Himalayas region is sparsely populated.

* Climate - (equable & moderate climatic conditions)

Ex - India is densely populated than the Sahara (desert)

* Water - (where freshwater is easily available)

Ex - River valleys of the world is densely populated than Antarctica.

* Resources - (availability of resources like coal, oil, fishing etc)
 Ex - Eastern USA is sparsely densely populated than the Thar Desert.

⇒ Human Factors

Includes -

* Political (stable governments)
govt. policies
 Ex - Singapore is densely populated and Afghanistan is sparsely populated.

* Social. (better education and health facilities) & religious significance

Ex - Pune and Varanasi (in India) are heavily populated. The Sahel in the Sahara is thinly populated.

* Economic (employment facilities, efficient transport network, etc)
 Ex - Western Europe is thickly populated ^{than the} and Amazon rainforest.
