

## Exercise-6

Add:

$$4) i) 13 + 15 = 28 \quad (ii) 15 - 13 = 2$$

$$(iii) 13 - 15 = -2 \quad (iv) 13 - 15 = -28$$

$$5) i) 259 + 214 = 473 \quad (ii) -528 - 243 = -771$$

$$(iii) -623 - 326 = -949 \quad (iv) 258 - 473 = -215$$

$$v) -622 - 254 = -876 \quad (vi) 257 - 254 = 3$$

$$6) i) 5 - 8 = -3 \quad (ii) -5 \text{ form } 8 = 13$$

$$(iii) 4 \text{ form } -7 = -11 \quad (iv) -8 \text{ form } -2 = 6$$

$$(v) -3 \text{ form } 12 = 15 \quad (vi) -6 \text{ form } -3 = 3$$

$$7) i) -123 \text{ form } 453 = 576 \quad (ii) -78 \text{ form } -12 = 66$$

$$(iii) 329 \text{ form } -124 = -453 \quad (iv) -222 \text{ form } 0 = 222$$
