

ASSIGNMENT

① Write the composition of Brass and Bronze?

Ans) Brass is an alloy of copper and zinc.
~~Bronze is an alloy of copper and alloy.~~

ASSIGNMENT

① Write the composition of Brass and Bronze?

Ans) Brass is an alloy of copper and zinc.
Bronze is a metal alloy consisting primarily of copper, usually with tin as the main additive but sometimes with other elements such as phosphorus, manganese, aluminium or silicon.

② Why copper is used in making electric wires?

Ans) Copper is used for making electric wires because it is highly ductile in nature. It is a good conductor of electricity.

③ Mention any two uses of iron.

Ans) (i) Iron is used in vehicles like cars etc.
(ii) Iron is used to make alloy steels like carbon steels with additives such as nickel etc.

④ Name the Non metal which is liquid.

⑤ Bromine is the non metal which is liquid.
