ch-3 cells

Short answer and questions

1 Briefly describe the three essential parts of a cell.

Ans - The important parts of a cell are:-

Cell membrane - Each cell is surrounded by a cell membrane. It is very thin, delicate and flexible. It is a living structure of the cell present in both plant and animal cell and it has fine pores through which only certain substances can pass in and out, while others cannot.

Cytoplasm - It is a semi-liquid, colourless and translucent substance found between nucleus and cell membrane.

Nucleus - Nucleus is a small spherical mass mostly located towards the centre of the cytoplasm. It regulates and coordinates various life processes of the cell. It plays an important part during cell division.
