Homework Physics ch-5 Light

1. What is light energy?

Ans: Light energy is a kind of kinetic energy with the ability to make types of light visible to human eyes.

2. Differentiate luminous and non-luminous body object.

Ans: The bodies which emit their own light are called luminous body. The body which do not emit light by their own but become visible by the light falling on them ~~or~~ by luminous body are called non-luminous bodies.
