## # Why DO we Fall Ill

### Homework

Q1. What do you mean by disease symptoms? Explain giving two examples.

Ans:- 1. A symptom is a change in normal functioning of the body which is felt by patient but cannot be observed by the doctor.

2. Symptoms only indicate that a patient is suffering from a disease, but they don't actually detect the disease.

Example:- ~~for~~ (1) Fever is the symptom of Malaria and Dengue.

(2) Stomachache is the symptom of Typhoid.

Q2. Write the symptoms when following organs are targeted by microbes

(a) Lungs (b) Liver (c) Brain

Ans: ~~(a) Lungs - When microbes attack the lungs, Tuberculosis and Pneumonia can occur.~~

Lungs -

(a) Symptoms :- 1. Cough, chest pain  
2. Breathlessness

(b) Liver - Vomiting, abdominal pain, Fever, Nausea

(c) Brain - Headache, Unconsciousness, Fits
