

it to humans. The earliest creatures that predated human beings were probably well aware of fire. When lightning would strike a forest and create a fire, it probably intrigued and amazed them.

30 How do you think our world would have been if human beings did not have the knowledge of fire? Give reasons for your answer.

Ans: Fire provided a source of warmth and lighting, protection from predators (especially at night), a way to create more advanced hunting tools and a method for cooking food. These cultural advances allowed human geographic dispersal, cultural innovations and changes to diet and behavior.

Ch-5

The fire bringer

Q1. Do you think fire is important to sustain life on earth?

Ans. A ground fire burns organic soils. A surface fire moves through grasses, forest litter and shrubs. The regime concept is vital because organisms are ~~not~~ not more adapted to fire " (or not) than they are to water they adapt to a pattern of burning.

Q2. How do you think fire came to the knowledge of mankind?

Ans. According to the Greek ~~mythology~~ mythology, Prometheus stole fire from the gods and gave
