	1 and 2		-		
7.	Ch-2 Apparatus and uses (Diagram) 23-25		21.5.2021		
8.	Precaution in laboratory,	26-	22.6.2021		
9.	Apparatus and uses (Hw)	27-29	22.6.2021		
10.	Objective type ques	30-32	28.6.2021		

Hw
28.6.21

OBJECTIVE TYPE

QUESTIONS :

1. Fill in the blank.

- Experiment and observation are the two important basic of chemistry.
- A porcelain dish is used for evaporating.
- test tube holder is the to hold the test tube while it is hot or being heated.
used for
- Mortar and pestle grinding and churning solid substances into powder.
- Glass apparatus is made of pyrex and borosil glass.

2. Match

Column A

Column B

iv) a) Iron stand

i) To hold chemicals

i) b) Test tube

iii) To keep solutions

v) c) Funnel

iv) To support apparatus

ii) d) Beaker

ii) To store solutions

iii) e) Glass rod

v) To transfer liquid

3. MCQs

a) Evaporating dish is made up of :

i) porcelain

b) Spirit lamp is made up of :

ii) all the above

c) The apparatus to measure an accurate volume of a liquid is :

iii) measuring cylinder.

d) To pass a gas from one vessel to another you will use :

ii) delivery tube

e) To prevent the escape of a gas from a gas jar, you will cover its mouth with :

i) watch glass.

4. true or false. Correct the false ones

a) A glass funnel is used to pour off liquids : True

b) A test tube is used to test liquid chemicals: False

Test tube is.
Correct statement: Use to boil or heat small quantities of chemicals.

c) A mortar and pestle is used for evaporation. False

Correct Statement: Porcelain dish is used for evaporation.

d) A glass rod is used to stir solutions.
True

e) A round-bottom flask is used to store chemicals. False

Correct Statement: Reagent bottle is used to store chemicals.
