RAINY SEASON

Rainy season is such a season that is liked by most of the people. It's the most refreshing and beautiful season. Everything feels fresh and cold in this season. The environment becomes clean and cool. After the long hot summer season, rainy season makes us cool with it's coldness. We can also enjoy hot tea with some snacks listening to the beautiful ~~rain dro~~ sounds of rain drops in the rainy season. It's a season that makes most of us drunk for it's freshness. Children too like to play in the ~~fun~~ muddy puddles created by the rain. But sometimes rain can be bad too. As due to heavy rain, in most of the places the electricity will be cut off and the children will also catch cold and fever if they play much in the rain.

Reading books with some hot tea and snacks ~~are~~ is the best thing to do during the rainy season. Due to rain we get water and plants and animals do get water to drink. We should also conserve water for our future. That's why we say:

"Save water,

Save life"
