

Autumn Season

Autumn is the season when the nature is clear. Autumn is the season after summer and before winter. It begins with the air. In autumn the leaves of the trees turn green, yellow and red. Autumn has its own unique beauty. Festivals like Dussehra Puja & Dussehra Puja is also celebrated in autumn. The weather of this season is liked by many people. Autumn is also known as the 'fall' season in some countries. Due to lack of rain, leaves start falling during up and then they fall and the new leaves come up in winter. Autumn is my favourite season.
