Q1.

What do you mean by disease symptoms. Explain giving two examples.

Ans) Disease symptoms refer to physical or mental difficulties that a person experiences. Symptoms may also refer to an indication of the presence of a particular disease. They are visible in the form of either structural or functional changes in our body or any of its parts. Eg :-

- lesions on the skin are the symptoms of chickenpox.
- Cough is the symptom of lung infection.

Q2. Write the symptoms when following organs are targeted by microbes

a) Lungs - Symptoms are

- cough
- Breathlessness
- Chest pain
