① Which of the following is responsible for the variation in the color of soil in different parts of India.

→ Difference in rock formation.

② Which of the following has not been a factor in the creation & modification of India's relief features? - Population density

③ Which of the following is a plausible theory presented by earth scientists? - Theory of plate tectonics

④ According to earth's crust is formed on how many major plates? - Seven

⑤ Which one of the following is not such a geological activity? - Glaciation

⑥ According to the Theory of plate tectonics, when some plates come towards each other, which of the following is formed? - Convergent boundary

- 7) When some plates move away from each other, which of the following is formed? - Divergent boundary
- 8) What have been the effects of the movement of the plates? - The plates may form divergent boundary
- 9) A landmass bounded by sea on three sides is referred to as a Peninsular
- 10) Which of the following division of India has the oldest landmass Peninsular plateau
- 11) The peninsular plateau of India is a part of which of the following landmass? - Gondwanaland
- 12) Which of the following countries or continents was not a part of the ancient landmass of Gondwanaland - Europe

- (13) The northward drift of the Indo-Australian Plate resulted in its collision with the much larger Eurasian Plate:- The Gondwanaland split into a number of plates.
- (14) Which of the following physiographic divisions of India was formed out of accumulation in tethy's geocycline:- The northern Plains
- (15) The Himalayan uplift of the ~~the~~ tethy's Sea & subsidence of the northern flank of the peninsular plateau resulted in the formation of a large basin:- The Himalayas
- (16) Geologically, which of the following divisions of India is supposed to be one of the most stable land blocks:- ~~Indian~~ <sup>The Peninsular</sup> Plateau
- (17) From the point of view geology, which of the following physiographic divisions of India is considered to be an unstable zone:- The Himalayas

18) Which of the following are young fold mountains :- The Himalayas

19) Which of the following ~~are~~ physical features forms a natural barrier to the north of India's Plateau of Tibet

20) The Himalaya's consist of three parallel ranges in it's longitudinal extent. Which of the following is the name of the northern-most range :- The Himadri

22) Lesser Himalaya or Himachal

23) Kanchenjunga

24) Bara Lachala & Shipkila

25) Himachal

26) Kamet

27) The Himadri

Himalaya

- (28) Which of the following ranges of the Himalaya are composed of unconsolidated sediments:-  
Shivaliks
- (29) The longitudinal valley lying between Lesser Himalayas & Shivalik are known as Dun
- (30) From west to east, the division of the Himalayas are demarcated by river valleys. The part of the Himalaya lying between the Satluj & Kali river is known as:- Humayun Himalayas
- (31) Which two hills are located in south east of Eastern ghats  
Javadi hills & Sheshay hills
- (32) Which is lands of India are called coral islands:- Lakshadweep
- (33) A narrow gap in a mountain range providing access to other side is Pass

34) The wet & swampy belt of the northern region is known locally as Terrai

34) Both A & R are correct & R is the correct explanation of A

35) If the prime minister is addressing the nation from Aizawl, she is in which state: - Meghalaya

36) 8 Jumps

37) Both A & R are true & R is the correct explanation of A

38) Both A & R are true & R is the correct explanation of A

39) TST, Bhuban, Meghalaya, Gulf of Mannar

40) News
